Professional Summary

Backend-focused Software Engineer skilled in building Python applications and REST APIs with Flask and FastAPI, backed by SQL databases (MySQL, PostgreSQL). Strong in database integration, query optimization, debugging, and object-oriented design. Experienced with Docker, Git, Linux, CI/CD, and Agile SDLC, plus data processing and machine learning in Python.

Technical Skills

- **Languages:** Python, SQL, HTML, CSS
- **Databases:** MySQL, PostgreSQL, SQLAlchemy, Query Optimization, Database Normalization
- **Backend:** Flask, FastAPI, REST APIs
- **Software Engineering:** Object-Oriented Programming (OOP), Data Structures, SDLC, Debugging, Code Reviews
- **Tools & DevOps:** Git, GitHub, GitHub Actions (CI/CD), Postman, Render, Vercel
- **Data Science & ML:** Pandas, NumPy, Scikit-learn, Random Forest

Experience

Data Science & Machine Learning Intern

Feb 2026 – May 2026

AIIMS Technology Council (IIMSTC), Bengaluru

- Built scalable Python ETL pipelines processing 50,000+ records using PostgreSQL query optimization and Pandas transformations to feed machine learning workflows.
- Developed backend workflows for data validation, normalization, and deduplication, delivering a fully automated 5-stage pipeline with reliable, production-grade data quality.
- Collaborated in Agile sprints on troubleshooting, testing, and technical documentation to improve delivery speed and reliability.

Freelance Web Developer

Nov 2025 – Dec 2025

M&F Kitchen (Client Project, Remote) | mandfkitchen.me

- Designed, developed, tested, and deployed a responsive full-stack business website end-to-end, running in production with zero downtime since launch.
- Configured GitHub Actions CI/CD pipelines to automate build and deployment, cutting release time by approximately 85%.
- Worked directly with the client to scope requirements and deliver a scalable solution that received stakeholder approval.

Projects

Python AI Blog Generator

Jan 2026 – Feb 2026

Python, FastAPI, Flask, Docker, OpenAI API | [Live Demo](#) | [GitHub](#)

- Built and deployed a scalable backend with FastAPI and Flask using REST API architecture, JWT authentication, and modular, clean code.
- Integrated external REST APIs with request validation and multilingual content generation; automated deployment with GitHub Actions CI/CD on Render.

AquaIntel Analytics

Mar 2026 – May 2026

Python, Streamlit, Scikit-learn, XGBoost | [Live Demo](#) | [GitHub](#)

- Built an end-to-end analytics application using Random Forest and XGBoost, achieving approximately 91% prediction accuracy.
- Developed interactive dashboards with CSV/Excel upload, data visualization, and geospatial analysis across 50+ districts.
- Performed feature engineering, preprocessing, and model evaluation; automated data validation for large datasets.

Next Gen Fitness Tracker

Jul 2025 – Jan 2026

Python, OpenCV, MediaPipe | [GitHub](#)

- Developed a real-time computer vision app with OpenCV and MediaPipe, processing webcam streams at approximately 30 FPS for exercise detection.
- Implemented pose estimation, automated repetition counting, session logging, and voice feedback using modular, object-oriented Python.

Education

Bachelor of Engineering (B.E.), Computer Science (Data Science)

2022 – 2026

Acharya Institute of Technology, Bengaluru

CGPA: 7.2 / 10

Certifications

Data Analytics Job Simulation, Deloitte (Forage), 2025 | Working with Subqueries in SQL, Coursera, 2025 | Getting Started with Git and GitHub, Coursera, 2025

Hackathons

36-hour VTU Hackathon: built and presented a working prototype in an Agile team | 24-hour National Hackathon: delivered a Python prototype under deadline
